Technology as the 'driver'

Arriva is a multinational public transport company headquartered in Sunderland, Tyne and Wear, United Kingdom. As of December 2015 it employed 55,000 people and operated 2.2 billion passenger journeys annually.

The technology targets

This project was developed with key members of the Arriva management team. There were multiple points identified as key target successes for the new project. Including the requirement for additional technology in meeting rooms incorporating the use of open collaboration and sharing of content, Interactive brainstorming, white-boarding and Skype for Business integration.

The aim of the project was to bring the meeting room standards to a high level as well as to promote meeting room utilisation and technology use. This was achieved by creating room types for the four meeting rooms.

Type 1: Huddle Room:

- Presentation to display via HDMI connection point
- Presentation audio from display speakers
- Web conferencing via Logitech system
- Mic/Speaker/Cam + Smart Doc Touch Panel

Type 2: Mobile MS HUB 55":

- Presentation to Display Via Wireless Windows 8 and above casting and Hard-wired connection points
- Presentation Audio from display speakers
- Web conferencing via Microsoft Surface HUB 55" all in one display device
- Mobile resource that can be utilised throughout office.

Ensuring user adoption

After the initial training workshop that took place to ensure that users were accustomed to the new technology the meeting rooms went into full circulation, since then positive feedback has been received throughout and the sheer volume of bookings of these rooms shows an immediate success.

Project overview

Project: Upgrade A/V equipment

Objective: Improving the overall technology experience & meeting room utilisation, whilst integrating S4B into the meeting room.

Location: Sunderland

Tech spec:
Large format Display
Wireless presentation
Intuitive interactive touch
Skype for Business web conferencing integration

Type 1:
The Huddle

Type 2:
Mobile MS Hub
