

## Bringing Healthcare to Life

As Healthcare organizations provide increased access to care for patients across an expanded geographic area, it becomes increasingly challenging to overcome obstacles such as limited financial resources, long distances to travel and staff shortages. Healthcare providers need a cost effective video solution that is easy to use, scalable, and requires minimal reoccurring fees.

### StarLeaf in Healthcare:

StarLeaf video collaboration solutions enable healthcare professionals to connect at a distance wherever or whenever needed. This extends the boundaries of the doctor's office, enabling connections with healthcare providers and experts around the world.

### Specific healthcare applications include:

-  **Expanding patient access to care**
-  **Reducing travel costs**
-  **Increasing access to medical specialists**
-  **Interdisciplinary reviews and coordination of care**
-  **Remote guided surgery and surgical training**
-  **Grand rounds & medical training**
-  **Expanded collaboration**

### StarLeaf features for healthcare professionals:

#### Screen Sharing:

Capture and share instructional material, patient data, documents, x-rays, charts and images via video during a video call or meeting, all while remaining HIPAA compliant.

#### Instant and personal one-to-one mobile communications:

Participate in on-demand, spontaneous video communication via video-enabled laptops and mobile devices, ideal for peer-to-peer conversations, virtual doctor visits sessions and reaching patients at home for managed care.

#### Unlimited point-to-point video meetings:

Use StarLeaf video conferencing systems to call into live meetings, consult with patients and doctors on demand or access medication specialists located in remote locations.

#### Scheduled collaborative group meetings:

Bring together multiple locations in one video for an interactive discussion, administrative planning meeting or grand rounds with each participant calling into a virtualized meeting room from any standards-based video system or video-enabled mobile device.

#### Directory of contacts:

Scroll and search for doctors, staff members or patients in a personalized directory that you can customize.
