Audio Visual Innovation

About Carillion Communications

The accomplished Carillion Communications team has years of experience designing, building and managing highly advanced Audio-Visual solutions that enhance our client’s abilities to connect, communicate and collaborate.

We deliver the full scope of technical support, from small upgrades to augment conferencing system functionality to crafting bespoke set-ups for complex organisational infrastructures.

World-class
Audio-Visual
solutions
that enhance
communication
and company
collaboration.

History

Our business has been leading the Audio-Visual market since 1993. As we’ve grown over the last three decades, Carillion Communications has embraced the opportunities that technological progress offers to bring us closer together.

From early-stage video conferencing to today’s integrated smart buildings, dynamic hybrid meeting spaces and one-click BYOD systems, we’re excited to show you the possibilities to help your workforce work smarter, not harder!

Our Differences

When you work with Carillion Communications, you gain a trusted partner skilled in the potential for Audio-Visual solutions to produce tangible pathways to achieve your aspirations.

From the very beginning of each project, we start with a thorough consultation. During this period we invest time and resource to understand your objectives and thoroughly identify your pain points and then we make tailored recommendations to surpass your expectations.

Carillion Communications Support Services

Since our inception AV has gone through many significant changes and developments, however our philosophy remains the same to work closely with our customers to deliver AV solutions that just work. We combine best in class equipment, sourced from a network of leading audio visual brands, with installation expertise from award winning teams at branches across the UK. We use this extensive experience of providing only high quality, well designed, robust and reliable installations as the platform for our maintenance and support services portfolio.

Managed Services

Fully managed on site 'white glove' services

- On-site and remote user support
- Video collaboration managed services
- Field engineering services
- Infrastructure & technology maintenance
- Event management
- Audio-Visual hire

Management Reporting

Key operational and service level data is captured during the life of the support contract, this is proactively analysed and reported on to better understand the system usage with supportive trend analysis.

- Summary of all Service activities – by location
- Performance against pre agreed SLA's
- Annual service management reviews
- Issue Log investigation – summarising failures

The purpose of the reporting and service management reviews is to monitor our performance against the contractual SLA's.

Innovations in Service Delivery

With thousands of successful AV installations behind us, we have researched and developed, risk assessed and stress tested to formulate an innovative

AV installation framework which seamlessly transitions into our Advantage Premier program using our in-house service-take-on process (SBTO). Our Playbook ensures the individual parts of the project – from the technology to the environment to the people – seamlessly align, simplifying the complexities and smoothly deliver an outstanding Support Service that is far greater than the sum of its parts.

Service Level Agreements (SLA's) are an integral part of any support services proposal acting as a blueprint of the service expectation and obligations that we will be providing as part of this proposal. Supported by management reporting, clear escalation process and continual improvement plan. We measure our ongoing success through our ISO 9001 incorporated customer perception surveys, a balanced scorecard framework which are all under pinned by agile principles.

On-site Engineer Support

In the event that a fault cannot be fixed remotely an engineer will be dispatched to site within the contracted response SLA. Working within a defined service management SLA the engineers are controlled and managed from our ConnectWise Helpdesk and are skilled, certified, and experienced across a range of AV and VC technologies and products. The engineers have direct access to both Knowledge experts and Manufacturer Support partner portals.

Big Brand Partnerships

Over the last 3 decades, we have established strong relationships with a far-reaching network of leading AV and collaboration manufacturers. This provides us with access to the very latest technologies, supplied through dependable chains of supply, enabling us to specify the right products each and every time.

We have researched and developed, risk assessed and stress tested to formulate an innovative Audio-Visual installation framework.

Flexible Support with fixed costs

Would you like to plan and manage your maintenance budgets and ensure you get fast, expert support at a known cost for a fixed period?

Carillion Communications provides pre-booked, fixed-cost maintenance packages that give customers the peace of mind that their critical collaboration facilities will be supported by experienced technical professionals as quickly as possible.

Carillion Care packages eliminate callout delays caused by waiting for purchase orders or approvals. Carillion Communications manages the maintenance of offices and thousands of endpoints in the UK, around mainland Europe and worldwide. Our extensive knowledge of all major AV manufacturers, hardware and Cloud technologies means we can guarantee minimum delay when it comes to keeping your systems operational. Callouts can also be used to schedule preventative maintenance visits as required.
