

Helping BTS to meet its 10 year AV future-proofing objective

project services

imagine if...

...the technology actually worked

Included in this project

- ✓ video collaboration
- ✓ AV solutions
- meeting room design
- digital signage
- ✓ integrated systems
- ✓ technical consultancy
- ✓ project management
- events
- AV hire
- ✓ maintenance/support

Contact our projects team

BTS is a very progressive global company that provides a powerful portfolio of professional services that centre on applied business experience.

Managing complex AV projects at BTS head office

The project Carillion Communications managed was the modelling of the new BTS offices in Hammersmith, London. BTS had moved from its previous base where it had been for five years. Of nine meeting rooms completed, six rooms were relatively straightforward while the other three involved some complexity and required very thoughtful planning. Video collaboration plays a big part in three of the rooms.

It was the multi-functional boardroom that presented the largest challenge as it also has to work as a breakout, training and seminar space.

Comparison with previous systems

When asked what the difference is now compared with the previous BTS office, Sucha Ballay replies, *“The difference is massive. The video collaboration is properly integrated, everything! No wires, very simple to use, everything swappable, wireless presenting, Clickshare compared with clunky HDMI.”*

Many rooms, many uses

The rooms are used a lot, for many different types of activity. Brainstorming on client material is an important company activity that is made more immersive in the new rooms. Video collaboration is used extensively with clients and with other BTS offices.

Skills transfer and mentoring is another important aspect of BTS’s work, so the rooms are used frequently for train-the-trainer sessions.

Project overview

Project:
Design and integrate collaborative meeting rooms

Objective:
Create a suite of flexible meeting rooms with an easy to use booking system

Location:
London

Tech spec:
Nine meeting rooms and four phone booths
